

Top Doctors

For everything and anything that ailed us, many of us remember being ushered to our family doctor — the kindly white-haired man who looked as though he had stepped out of the Norman Rockwell painting on his waiting room wall.

While that doctor still exists in some fashion, he or she is now accompanied by scores of medical specialists. It can be daunting to decide who to see for a specific ailment, but it is also reassuring to know that there is a specialist out there.

We randomly surveyed 900 local Blue Cross Blue Shield Network Physicians to ask who they would recommend in various specialties. The following is a list of doctors who doctors recommended most. The profiles that follow are a glimpse into the impressive pool of doctors they suggested. The complete list of top docs begins on page 70.
